SUMMARY

AI/ML Engineer with 1.5+ years of experience in RAG systems, LLM evaluation, Agentic AI, and multi-agent workflows. Experienced in prompt engineering, fine-tuning, and MLOps with LangGraph, FastAPI, and FAISS.

TECHNICAL SKILLS

Programming: Python, SQL, C++, Java

Generative AI & ML: LLMs, Retrieval-Augmented Generation (RAG), Multi-Agent Systems, LangGraph, LangChain, FAISS, Transformers, NLP, RLHF, Fine-tuning, Deep Learning, Embeddings, PyTorch, TensorFlow, AI Agents, Prompt Engineering, Agentic AI, Evaluation Frameworks

MLOps & Systems: FastAPI, REST APIs, PostgreSQL, Docker, JWT Authentication, SSE Streaming, Vector Databases, Model Deployment, MLOps, Benchmarking, Git, GCP, Supabase

EXPERIENCE

Software Development Engineer I (Contract)

Jun 2025 – Feb 2026

Amazon via Aditi Consulting — Remote

- Performed **RLHF**-based evaluation of 500+ LLM outputs across Python, Java, AWS, and Linux domains, identifying systematic reasoning failures and contributing to model alignment improvements.
- Designed benchmarking and evaluation frameworks to assess response quality, instruction adherence, and hallucination patterns; findings fed directly into model training cycles.

LLM Python Engineer (Contract)

Sep 2024 – Apr 2025

Turing — Remote

- Executed large-scale LLM evaluation and validation workflows across Python, SQL, and ML tasks; evaluated 300+ model responses per week to improve output quality and instruction adherence.
- Contributed to prompt optimization workflows through systematic error analysis, improving model consistency across multi-step reasoning tasks.

Data Analyst Intern

Jun 2024 – Aug 2024

Quation Solutions Pvt. Ltd — Lucknow, India

- Performed demand forecasting and CPG analysis using Python and SQL across 3+ product categories.
- Built Power BI dashboards adopted by the analytics team to support weekly data-driven decision-making.

Software Engineer Intern

Jul 2023 – Aug 2023

Microsoft India (R&D) Pvt. Ltd — Hyderabad, India

- Designed and developed a **COGS Calculator** to forecast cost impact of new features over a 3-year horizon; used by the team to evaluate 10+ feature proposals.
- Implemented automated monitoring and alerting workflows to track cost deviations post-deployment, reducing manual review effort by ~30%.

PROJECTS

PromptCompiler – AI-Powered Prompt Engineering Platform

Jun 2026 – Present

LangGraph · FastAPI · Docker · Groq (LLaMA) · Supabase · Next.js

Live Demo

- Built and deployed a SaaS platform using **LangGraph** and **FastAPI** that transforms user intent into structured, platform-optimized prompts through an 8-stage multi-agent AI pipeline.
- Engineered scalable backend with JWT authentication, usage tracking, and LLM integration via Groq-hosted LLaMA; containerized with Docker and deployed on Vercel + cloud backend.

Interactive AI Assistant (RAG-based)

Dec 2025 – Feb 2026

LangChain · FastAPI · FAISS · SSE Streaming · Python · LLM APIs

- Developed a production-grade **RAG** system using FastAPI, FAISS, and LLM APIs with real-time SSE streaming, achieving sub-500ms response latency for document Q&A.
- Built end-to-end document ingestion, chunking, embedding, and semantic retrieval pipeline; reduced hallucination rate by ~40% compared to direct LLM prompting on domain documents.

EDUCATION

B.Tech in Computer Science and Engineering

2020 – 2024

Pranveer Singh Institute of Technology — CGPA: 8.3/10

ACHIEVEMENTS

Selected among top 6% (3K/50K) in Microsoft Engage Program'22; secured internship at Microsoft
1500+ LeetCode rating; 5-Star Problem Solving (HackerRank); Hacktoberfest contributor
